NOT ONE OF THESE TIRES WAS PUNCTURED ON THE ENTIRE TRIP. Every RAMBLER that started came through, and every machine fitted with G. & J. tires that started came through, except four machines (not Ramblers), the frames of which broke down. These facts are not remarkable in themselves, as RAMBLERS and the G. & J. This is the critical moment. The turning point is now. If free coinage were restored in the United States it would be the end of the single gold standard. On the other hand, if the absolute repeal of the present silver law in the United States can be forced through, the work is done. It was therefore deemed safer to stop coinage in India first.

The immediate consequences will be that silver will fail and gold will increase in value faster than ever. Prices will soon begin to fall in India. The whole world in time will feel the effect of the consummation of this last act of the gold conspirators. Prices will continue to fall everywhere as gold rises. The end no one can see. Representative Wheeler of Alabama said that peaing the Sherman law the further legislation necessary to give a sufficient and sound currency must be thought out very carefully. His own opinion was that immediately on the meeting of Congress a resolution would be passed giving the President the power at his discretion to stop the purchase of silver for a limited time during the resident. session of Congress. The object of this, he said, would be, of course, to stop the operation of the law while preparations for permanent legislation were being made.

Representative Tracey of New York said that

Representative Tracey of New York said that he thought that this action in India made the repeal of the Sherman law inevitable. He said that he was prepared now to see silver run down to an extremely low point of value, and it would be like the storing of most any other commodity and issuing currency against it. He said that he did not see how any sane Representative in Congress could now contend for free coinage, as the fact is now indisputable that the United States would become the dumning ground of the world for

DISPUTE OVER A BOUNDARY.

LONDON, June 28 .- A dispatch to the Times from Bangkok, capital of Siam, says that the French gunboat Lutin has anchored in the river opposite and has made preparations to fire upon the city. The topmasts of the gunboat have been struck and guns have been mounted in the fighting tops. The French admiral in his flagship is expected to arrive in Siamese waters from Saigon.

One pensioner, it has been discovered, was never in the military service at all, but has been drawing his pension with regularity and dispatch just the same.

A number are dropped from the rolls for not having served ninety days, as the law requires; others dropped because the disability for which they are drawing pensions is the result of their own vicious habits.

Siam, the dispatch adds, though most anxious to maintain friendship with the French, is quietly determined to resist aggression, and is preparing herself for any contingency that may

AN UNEASY FEELING

Among Clerks in the War Department Just Now, and Why.

With the beginning of each fiscal year there is always more or less change in the personnel of the employes in the departments, caused by new legislation, which then goes into effect. The new fiscal year, which begins July 1, it is believed will be no exception to the rule, and particularly in the case of the War Department employes there is much apprehension felt.

It is stated that a quiet inquiry has been in case it was necessary to summon huntry, as it would take nearly two hours to secure their available of \$50,000. In view of the lack of money to carry out the full intention of the law the policy of the Treasury Department will be to first act on the case of Chinese It is stated that a quiet inquiry has been in progress in that department, conducted by the arrival, but was unable to notify the comwire was out of order.

> Steps are in progress to remedy the defect so as to permit prompt and reliable communication with the post. It is understood that the telephone company will subject their line at the point of conjunction to some patented arrangement which will nullify the process of induction. A similar precaution was recently taken with the telephone wire running to the Soldiers' Home at a point where it crosses the trolley wire of the Brightwood railroad.

The War Department has a grievance against the Washington and Arlington electric railroad, in that its trolley line frequently interferes with telephonic communication with the cavalry post at Fort Myer, Va.

The wires of the trolley company and the telephone company cross at a point somewhere between the Aqueduct bridge and the fort, and the current of the telephone wire is frequently entirely overpowered by reason of the induction of the whole evidence adduced in the above entitled matter, become satisfiel that Mr. Charles E. Foster is without fault or blame in connection with the unlawful procurement of copies of the Drawbaugh files, we deem it right and proper, and our duty, to so advise you and to request in this formal manner that the charges against Mr. Foster be dismissed."

THE GEARY LAW.

In the Ford's Theater (record and pension bureau) case against Ainsworth, Covert, Sasse and Dant, the grand jury is still engaged in the examination of witnesses, the following having been summoned for today: C. E. Goodwin, R. J. Bell, John P. Sprecker, H. P. Willey, D. B. Johnson and W. Patterson.

It is therefore not probable that indictments will be returned for some days, as, after the grand jury concludes the examination of witness and twelve or more vote for finding a presentment and send such paper to the district attorney, it will require some time (two or three days perhaps) to prepare an indictment to submit it for the signature of the foreman. After this it is reported to the court. Hence no indictment is probable before Friday, and it may be impossible to present any before next week, supposing, of course, that one or more indictments will be returned.

Detective Carter is engaged on the case in getting the proof as to the victims, their removal from the ruins, &c.

which caused much joy among the Irish mem-bers and those of the radical party who believe that the time has come for throwing out many of the amendments to the home rule bill offered by the opposition for the purpose of delaying the passage of the measure. Mr. Gladstone stated that tomorrow he would move the adoption of a resolution calling upon the house to expedite the passage of the bill. This announcement was greeted with cheers

by the supporters of the government.

Mr. Gladstone added that the terms of the resolution were nearly prepared and he hoped to communicate it to the house before today's session closed.

In replying to a question asked by the Right Hon. A. J. Balfour, leader of the opposition in the house, Mr. Gladstone said that the resolution he proposed to move would be on the same principle as the resolution offered in 1887, though it would contain some important modifications.

World's Pair Grounds, Chicago, June 28.-A bright, clear sky and delightfully cool weather greeted the visitors at the world's fair this morning and tens of thousands of them

took advantage of it. There was scarcely a break in the streams of people that poured in at the numerous gates from the hour they opened until noon, and from the sale of tickets up to 11 o'clock this forenoon the chief of the bureau of admissions estimated that the paid admissions alone for the day would not be much under 135,000 to 140,000. There was no special attraction at the fair to bring the visitors out. They simply came to see the permanent exhibits and the grandeur of the exposition itself.

It is but just to the gentlemen named to say that the official data bearing on the subject shows that nothing of the kind transpired at the convention; that no charge of misappropriation was brought against any member or ex-member of the board of trustees, and that neither Mr. Vaughan nor Mr. Donath were removed from the board. WANT THE SHERMAN ACT REPEALED Views in the West on the Falling Value of

CHICAGO, June 28.—That the action of the Indian government in suspending the coinage of silver will have a depressing influence in the United States is the general opinion in banking circles of Chicago. Many consider that the only method of relief lies in the immediate repeal of the Sherman silver law. This, it is thought, will not only restore confidence in this country, but will have good effect abroad in showing that this government is willing to fol-low in the well-tried lines of old world financial experts.

MR, BLAND'S VIEWS.

He Regards India's Action as Part of

Sr. Louis, June 28.-In an interview Congressman Richard P. Bland gave as his opinion that the suspension of free silver coinage in India would have a serious effect on the financial policy of this government and mo

especially the silver advocates.

He said: "Most emphatically I do not think it is a knock-out for silver in this country. On the contrary, I think that if Congress does not adopt some measures looking to a bimetallic standard it will make the battle of standards the coming issue in this country. This battle will disrupt political parties and cause a contest between the commercial centers and the agricultural districts of the country. The domonetization of silver is a conspiracy between the banking institutions of England and the eastern portions of the United States, and the suspension of silver coinage in India is part of this conspiracy to buildoze the Congress of the United States into the adoption of the single gold standard. I do not believe that they will succeed."

It is stated that the banks intend to raise a legal question as to whether a telegraphic intimation of a change in the law is sufficient to change the law and to justify the mints in refusing the silver that was tendered to them on Monday last.
